Throughout history, cars have reflected innovation...kinetic art, industrial design, and skillful engineering inspired decades of rolling sculpture that enabled early transportation, elegant travel, and racing history. Automotive design is in fact a reflection of our imagination and what the future may hold. Design is everywhere, but a car is personal. The rich history that accompanies the commission of some of the most extraordinary vintage vehicles in our history is an inspiring message. Innovation is a theme throughout this exhibition, confirming that art, science, and technology go hand in hand.

During the **Community Exhibition** visitors of all ages will have the opportunity to experience the history and design of rare, one of a kind, classic pre- and post- war automobiles in this "dream car" exhibition. Group tours by renowned automotive historians will be offered throughout the day, and guests will have the opportunity to be the judges and cast their votes for Most Artistic, Most Elegant, People's Choice and the Young Connoisseurs' Award .

The community and guests will have the opportunity to view **The Grand Tour Parade of Cars** departing the main lawn from the Ann Norton Sculpture Gardens, crossing the bridge and touring the island of Palm Beach.

All tickets will be sold in advance in accordance with safety compliance following CDC and the City of West Palm Beach guidelines for COVID protocol. Visitors will be welcomed by the hour.
